PROFESSIONAL SUMMARY

I am a Software Engineering student at Near East University with a background in project management and academic system development. Experienced in building web-based systems including survey platforms, task management, and appointment scheduling applications. Strong interest in backend development, system analysis, and software quality.

EDUCATION

Near East University | Nicosia, North Cyprus
Bachelor of Engineering in Software Engineering
Expected Graduation: [2026]
Relevant Coursework: Python Programming, Software Engineering Trends, Management Information Systems, Project Management, Database Systems

University of Jos - Nigeria
Bachelor of Engineering in Civil Engineering (Transferred)

WORK EXPERIENCE

Federal Mortgage Bank of Nigeria| Project Management for Construction
Project Management Intern **| Sep 2021- Jan 2022**

- Contributed to the preparation and distributed Project documents including contracts, change orders, progress reports, client information and account to various departments.
- Reviewing and Sorting emails that were sent from the other branches across Nigeria. Analyzed and Reviewed data and financial statements of clients and workers and maintaining project schedules using Software like Microsoft Excel.
- Accompanied workers and clients to site visits to observe construction progress, identify potential issues and report findings to project managers. Engaged in continuous learning and professional development opportunities provided by the project management team.

ACADEMIC & SOFTWARE PROJECTS

Online Survey Management System
Final Year Project Node.js, TypeScript, Sequelize, MySQL

- Designed and developed an online survey platform for creating, distributing, and responding to surveys.
- Implemented backend services using Node.js and TypeScript with Sequelize ORM and MySQL.
- Developed features including surveys, questions, options, answers, user authentication, and dashboards.
- Created system documentation including ER diagrams, DFDs, and SRS.

Task Management System
Academic Project | Web Application

- Developed a task management web application to create, track, and manage tasks.
- Designed task workflows including deadlines, updates, and completion status.
- Applied requirements analysis and basic system design principles.

Hospital Appointment Scheduling Website

Academic Project | Web-Based System

- Designed a hospital appointment scheduling system to allow patients to book appointments online.
- Focused on reducing scheduling conflicts and improving workflow efficiency.
- Analyze system requirements and user interactions for patients and hospital staff.

SKILLS & INTERESTS

Technical Skills

- Programming: Python (Basic)
- Backend & Databases: Node.js (Basic), MySQL
- Tools: Microsoft Excel, Word, PowerPoint, Google Workspace

Soft Skills

- Communication
- Teamwork
- Analytical Thinking
- Problem Solving

Languages

- English (Fluent)

Interests

- Fitness, Baking, Reading
